

FOR IMMEDIATE RELEASE

KTMB MMC CARGO EXTENDS ITS CONNECTIVITY TO PORTS IN JOHOR

KUALA LUMPUR, 4 April 2016 – KTMB MMC Cargo Sdn Bhd (KTMB MMC Cargo) further strengthens its Rail feeder services by extending its connectivity from Port Klang to Johor Port and Port of Tanjung Pelepas for domestic and transshipment containers.

KTMB MMC Cargo's 100-container freight train, the longest laden container, successfully embarked on a landmark journey from Port Klang to Johor Port recently. The newly extended route will boost our feeder services following the success of regular and fixed schedule of Rail Inter-Terminal Transfer (ITT) Services between Port of Tanjung Pelepas and Johor Port.

The rail mode alternative offers a more seamless, flexible and reliable service to meet the industry's growing demand and customers' needs. This showcases our innovative logistics solutions and co-modality in optimising different mode of transport from the congested road corridor.

YBhg Dato' Sarbini Tijan, President of KTM Berhad shared that "We look forward to serving all industry players with our rail cargo facilities which are now accessible from Port Klang to Johor. The new extended connection will simultaneously boost our productivity and economy via cargo services."

“In line with the Government’s initiatives to ‘MERAKYATKAN Keretapi’, we are committed to promote the rail freight industry by offering transportation of goods via rail services for all businesses in the country”, said Dato’ Sarbini.

KTMB MMC Cargo is responsible for developing rail freight services for integrated and efficient inland distribution for port users. The rail team manages the link between shipping lines, shippers, freight forwarders and railway operating company (KTMB).
