FOR IMMEDIATE RELEASE

PTP IS MALAYSIA’S FIRST PORT WITH STATE OF THE ART MARINE SYSTEM

19 April, Gelang Patah — Port of Tanjung Pelepas (PTP), a joint venture company of MMC Corporations Berhad and APM Terminals continue its commitment towards becoming a green port by offering advance vessel traffic monitoring process through its latest Marine Resource Management System (MRMS) & Vessel Traffic Monitoring and Information System (VTMIS). PTP is the first port in Malaysia to attain the state of the art marine system.

VTMIS is a service that primarily improves efficiency of vessel traffic movement and safety of navigation within port approaches or through hazardous areas. The systems are acquired from a joint collaboration between PTP and Johor Port Authority (JPA).

The systems, which have the ability to reduce the company’s carbon footprint, specifically paper usage, are yet another example of the PTP’s commitment towards green technology and sustainable development.

Ian James, Group Chief Executive Officer of MMC Port Holdings Sdn Bhd (MMC Ports) shared that, “Environmental sustainability is integral in our governing policies and we are proud to be taking proactive measures towards that. With the implementation of MRMS & VTMIS, it will simultaneously improve the environment and further strengthen the safety and security of vessel navigation within the PTP terminal.

“One of the main services provided by these systems is to provide PTP with much greater levels of situational awareness, with integrated sensors and communication services which can cover an area that is well beyond the capability of the human eye. The systems are also able to provide information on dynamic weather conditions. Furthermore, it offers real time vessel status information to all the customers effectively” added James.

According to Razif bin Ahmad, General Manager of JPA, the systems enable the port operator to minimise any potential harmful environmental impact to the stakeholders and its surrounding. JPA is pleased with the new measures and any continuous efforts to improve safety, security, environment and maritime business growth in the region as a whole.
